

MSH WIPS Access

Unlike other sites, MSH does not have a consult list for subspecialties. The resident or staff who is covering the pager will receive a page/call from the attending team. It is essential to get the MRN of the patient.

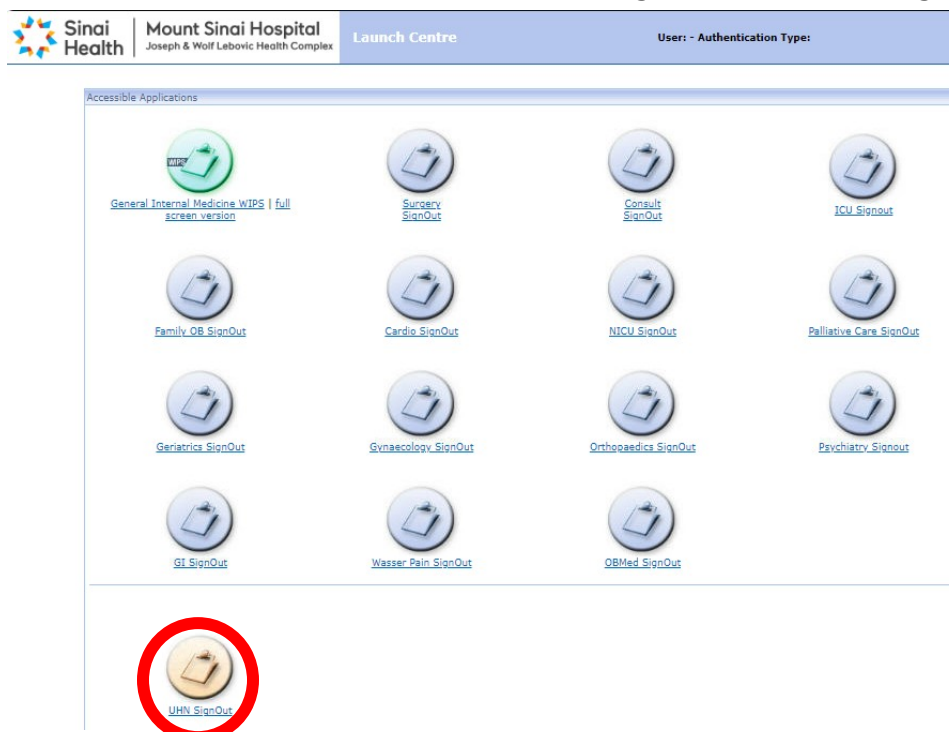

There are two ways to access patients that have been consulted on at MSH and to add new patients to this list.

1. Access through EPIC

- a. In the top left hand corner there is a button **“MSH WIPS”** see below, click this button.

- b. The next screen looks like the following, click on UHN Sign Out.

- c. You must then log on with your MSH hospital user ID.
 - d. Then select from drop down menu "**Rheumatology**" and password is **uhnuser**.
 - e. Here you can see existing patients on the list or add a new patient using "Add New" button.
 - i. In order to add a patient to the list, you must have the MRN, the rest of the demographic details will auto-populate once this is input.
2. Through MSH on site or remote access.
- a. Log in to PowerChart using MSH credentials.
 - b. In bar at top of screen on right, click on MSH WIPS.
 - c. Click UHN signout as above.
 - d. Select **rheumatology** from the drop down menu.
 - e. Input password "**uhnuser**"
 - f. Remainder of process as above
